

**General Education and Diversity Committee**  
**Approved Minutes**  
**March 24, 2008**

Present: Peggy Ballard, Christopher Corley, Steven Gilbert, Julie Kerr-Berry, Ron Nickerson and Jim Rife

There was a discussion of proposal 08-15, CS 201W, Artificial Intelligence and Science Fiction. The course was approved for Categories 1c and 6 with the request that the prerequisite for Eng 101 be dropped. It was not approved for Category 9. There needs to be more evidence of how the outcomes will be met for this category.

There was a discussion of a request to allow Geog 1125 from Normandale to transfer with Category 1c credit. Since there appeared to be a maximum of 15 pages of writing required for the class, it did not meet criteria for Category 1c. The request was not approved.

There was a discussion of the upcoming General Education presentations to the CETL Certificate groups

Respectfully Submitted by

Jim Rife
