IMPRESSIONS:

1. Considerable relapse occurred during follow-up telephone conversations.
2. 5 of 9 subjects no longer wear the device.
3. Environmental noise is the reason most frequently cited for not wearing the device.
4. All subjects reported they would purchase the device again.
5. Inconsistent use of the device is an issue.
6. 2 recent fittings with pre-teens are promising.
7. All subjects reported greater confidence when using the SpeechEasy.
