

Adobe Presenter

Adobe Presenter 7 enables you to use Microsoft PowerPoint to quickly and easily turn PowerPoint presentations into dynamic, multi-media content for the web.

You can personalize PowerPoint presentations with your own-recorded narration and deliver presentations through any standard web browser. You can record and edit audio narrations for each slide or animation, create quizzes or self-tests, and embed Flash animations and video directly into the presentation. The completed presentation is published to the server where it is converted into Flash and made available via a simple URL. Adobe Presenter presentations can also be uploaded to another web server or burned to a CD-ROM.

More Information:

Getting Started with Publishing Presentations - (Faculty, Staff, and eligible graduate students only)

1. Install Adobe Presenter. Presenter is installed as a menu in Microsoft PowerPoint.
 - a. NOTE: If you download and install Adobe Presenter 6, it will add a Presenter menu inside your PowerPoint application. The Presenter menu allows you to create audio narrated presentations and publish them locally or to the web.
2. On the left-hand side of the page under "Learn", click on "Getting Started".
3. Click "Install Adobe Presenter".
4. 'After downloading, double-click on the file and follow the installation instructions. After installation is completed, an Adobe Presenter option will be added to the PowerPoint menu bar.
5. To publish to the Breeze Server, (Faculty, Staff, and eligible graduate students only) the URL to use for Breeze Server Preferences is "https://breeze5.metnet.edu".
6. Log in to Connect Manager to manage content, including setting permissions or using presentations in courses and curriculums.
7. Consult Adobe Presenter Resources to learn more.
