

## **Recycling Procedure**

A large variety of recyclable material is routinely picked up by MSU workers and processed as part of our Integrated Waste Management System (IWMS). Two main types of mobile collection bins are used - one for fiber products (all paper, newspapers, cardboard), and a separate one for commingled containers (pop cans, tin cans, plastic, and glass bottles).

Used "Ink Jet" computer printer cartridges (brand names Hewlett Packard, Canon, and Lexmark) are recyclable. Apple product recycling is not yet available. Collection sites include the Computer Store, Building Services, and the Residence Halls.
