President’s Fall Retreat
Table Discussion Notes for Academic Mapping and Planning

Number of participants: Nine participants representing faculty, staff, administration and students.

Primary Table Discussion Themes:

• Academic mapping will be tremendously valuable when working with prospective students and their families.
• Academic maps will be invaluable for students in supporting appropriate academic planning and setting academic expectations.
• Academic maps will fill a gap currently present within the academic bulletin – pathways and course sequencing.
• Academic mapping will support academic departmental planning for course offerings and student demand.
• Academic mapping and planning will not solve everything or work for every student.
