Program Description	<p>The State of Minnesota grants science teacher licensure for grades 5-8 general science, 9-12 Chemistry, 9-12 Earth Science, 9-12 Life Science, and 9-12 Physics. Students earning a degree from Minnesota State Mankato in earth science teaching, life science teaching, or physics teaching will qualify for two licenses (1) 5-8 general science and (2) 9-12 specialty. Students earning a degree from Minnesota State Mankato in chemistry teaching will qualify only for 9-12 specialty license.</p> <p>The Earth Science Teaching, Life Science Teaching and Physics Teaching majors requires the 31 credit general core and a science emphasis that ranges from 27-35 credits of science and science teaching methods courses. In addition, the student must complete a 30 credit professional education component and the 3 credit Drug Education course. The Chemistry Teaching major does not require the 31 credit general core.</p> <p>The University Science Teaching Program must meet specific competencies to meet professional accreditation and licensure requirements. To stay within the required degree limits of 120 credit hours, students are strongly advised to select courses within the 44 credit general education program that meet both teaching program and general education needs. It is important for the student to meet with their advisor to assist with program planning.</p> <p>A minor is not required for any of the science teaching programs; however, to broaden one's teaching opportunities, double majors are encouraged. For further details, the student should check with one of the science teaching advisors for an overview of available opportunities.</p>
