

## Percent of Land in Farms, 2002

Statewide, slightly more than one half of Minnesota's total acreage was in farmland, according to the 2002 Census of Agriculture. Renville and Steele counties showed the highest percentage of land in farms. In general, counties in the south and west of the state showed higher percentages of land in farms, with urban and the more forested northern and northeastern counties showing less. The Arrowhead counties of Lake and Cook reported the least amount of land in farms.
