

Projected Population Age 65 and Over, 2030

Minnesota's overall median age is projected to increase from 35.4 years on 2000 to 40.2 years in 2030. The trend in aging is expected to continue along the same course as it has in rural Minnesota and even increase in counties attracting retirees. The trend, however, appears to be offset in some southern and western counties like Blue Earth, Lyon, Clay and Nobles.
