General Education
Minnesota Transfer Curriculum
Completion of the Minnesota Transfer Curriculum fulfills the general education requirement for any Minnesota public institution. Students transferring with a completed Minnesota Transfer Curriculum will satisfy the Minnesota State University, Mankato's general education requirement. Completion of goal areas within the Minnesota Transfer Curriculum will be accepted as completion of that same goal area at Minnesota. Individual competencies will be evaluated and transferred on a course-by-course basis.

Students transferring from MSU to another Minnesota public institution of higher education will have fulfilled the Minnesota Transfer Curriculum if they have completed required courses in the following ten categories: Communication, Critical Thinking, Natural Science, Mathematical/Logical Reasoning, History and the Social and Behavioral Sciences, Humanities and the Arts, Human Diversity, Global Perspective, Ethical and Civic Responsibility, and People and the Environment.

General Education Guidelines
1. A total of 44 credits must be completed to satisfy the General Education Program at Minnesota State University.
2. Students transferring with the Minnesota Transfer Curriculum completed will be considered to have completed the MSU General Education requirements.
3. While included in general education at Minnesota State University, Mankato, categories 11, 12, and 13 are not part of the Minnesota Transfer Curriculum.
4. A single course may be placed in one or two categories and also may be designated as a Writing Intensive course. Each credit in any of these courses, however, may be counted only once in meeting the 44 credit requirement.
5. The Critical Thinking category two may be satisfied either by taking a course or by the satisfactory completion of the other General Education categories.
6. In each category where two courses are required (i.e., #3, 5, and 6), students are required to take courses from different disciplines.
7. For general education credits, students may take no more than two courses or eight (8) credits, whichever is greater, from the same discipline. The only exception is English, in which three courses may be taken. This exception is allowed because of the Category 1a requirement of ENG 101.
8. For Bachelor of Science in Electrical Civil, Computer or Mechanical Engineering General Education see the program requirements for a detailed explanation of general education coursework for these two degree programs.
9. The general education requirements of the Associate of Arts degree are the same as for the Bachelor of Science degree.
10. General Education courses that satisfy core requirements for cultural diversity are identified by *. Those that satisfy related requirements for cultural diversity are identified by ^.

Category I: Communication
Goal: To develop writers and speakers who use the English language effectively and who read, write, speak, and listen critically. At a base, all students should complete introductory communication requirements early in their college studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement. There are multiple opportunities for interpersonal communication, public speaking and discussion.

Part A: English Composition (requires one course, 3 credits or more, with a grade of at least "P" or "C")
Goal: To develop writers who use the English language effectively and who read and write critically. This course will require faculty-critiqued writing. Writing competency is an ongoing process which needs to be reinforced throughout the curriculum.

Students will be able to:
(a) demonstrate and practice strategies for idea generation, audience analysis, organization of texts, drafting, evaluation of drafts, revision, and editing;
(b) write papers of varying lengths that demonstrate effective explanation, analysis, and argumentation;
(c) become experienced in computer-assisted writing and research;
(d) locate and evaluate material, using PALS, the Internet, and other sources;
(e) analyze and synthesize source material, making appropriate use of paraphrase, summary, quotation, and citation conventions;
(f) employ syntax and usage appropriate to academic writing and the professional world.

Course(s) which satisfy this category include:
ENG 101
Part B: Speech and Oral Reasoning (requires one course, 3 credits or more)
Goal: To develop skills necessary for reasoned communication. Courses in this category will require individual public speaking which is critiques by the instructor. Speaking and reasoning competency is an ongoing process which needs to be reinforced throughout the curriculum.

Students will be able to:
(a) understand/demonstrate communication processes through invention, organization, drafting, revision, editing and presentation;
(b) participate effectively in groups with emphasis on listening, critical and reflective thinking, and responding;
(c) analyze, evaluate, and synthesize in a responsible manner material from diverse sources and points of view.
(d) select appropriate communication choices for specific audiences;
(e) construct logical and coherent arguments;
(f) use authority, point of view, and individual voice and style in communications;
(g) employ syntax, usage and analytical techniques appropriate to academic disciplines and the professional world.

Course(s) which satisfy this category include:
CDIS 201 SPEE 100 SPEE 102 SPEE 212 SPEE 233

Part C: Writing Intensive (requires one course, 3 or more credits)
Goal: Students will continue to develop skills taught in Composition, applying them in the context of a particular discipline.

Students will be able to:
(a) use writing to explore and gain a basic familiarity with the questions, values and analytical or critical thinking methods used in the discipline;
(b) locate, analyze, evaluate, and use source material or data in their writing in a manner appropriate to intended audiences (popular or within the discipline).

Course(s) which satisfy this category include:

Category II: Critical Thinking (requires completion of the rest of the Gen. Ed. Program or one course)
Goal: To develop critical thinking, communication, and problem solving skills.
Courses in this category must focus on skill development and throughout the course will provide opportunities to exercise skills. Although the exercise of skills requires a subject matter, the emphasis in this category will be on skill development. The skills will not be ones that are specific to the practice of a particular discipline or area of inquiry but rather will be skills that are common to different disciplines and different areas of inquiry.

Students will be able to:
(a) gather and analyze information of various kinds, employing formal or informal tools to represent information in ways useful for solving problems;
(b) weigh evidence for and against hypotheses;
(c) recognize, construct, and evaluate arguments;
Goal: To improve students' understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. Students should be encouraged to study both the biological and physical sciences.

Students will be able to:
(a) develop understanding of scientific theories;
(b) formulate and test hypotheses in either laboratory, simulation, or field experiences;
(c) communicate his/her experimental findings and interpretations both orally and in writing;
(d) apply the natural science perspective to society issues.

Category 4: Mathematical/Logical Reasoning
(requires one course, 3 credits or more, with a grade of at least "P" or "C")
Goal: To increase students' knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments, and detect fallacious reasoning. Students will learn to apply mathematics, logic, and/or statistics to help them make decisions in their lives and careers.

Students will be able to:
(a) illustrate historical and contemporary applications of mathematical/logical systems;
(b) clearly express mathematical/logical ideas in writing;
(c) explain what constitutes a valid mathematical/logical argument (proof);
(d) apply higher-order problem-solving and/or modeling strategies.

Category 5: History and the Social and Behavioral Sciences
(requires two courses from different disciplines, 6 credits or more)
Goal: To increase students' knowledge of how historians and social and behavioral scientists discover, describe, and explain the behaviors and interactions among individuals, groups, institutions, events and ideas. To challenge students to examine the implications of this knowledge and its interconnection with action and living an informed life.

Students will be able to:
(a) employ the methods and data that historians and social and behavioral scientists use to investigate the human condition;
(b) examine social institutions and processes across a range of historical periods and cultures;
(c) use and critique alternative explanatory systems or theories;
(d) develop and communicate alternative explanations or solutions for contemporary social issues.

Category 6: Humanities and the Arts
(requires two courses from different disciplines, 6 credits or more)
Goal: To expand students' knowledge of the human condition and human cultures, especially in relation to behavior, ideas, and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy, the fine arts, students will engage in critical analysis, form aesthetic judgments, and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society. Students should have experiences in both the arts and humanities.

Students will be able to:
(a) demonstrate awareness of the scope and variety of works in the arts and humanities;
(b) understand those works as expressions of individual and human values within an historical and social context;
(c) respond critically to works in the arts and humanities;
(d) engage in the creative process or interpretive performance;
(e) articulate an informed personal reaction to works in the arts and humanities.

Students will be able to:
(a) describe, analyze, and evaluate political, economic, humanistic, artistic, social and cultural elements which influence relations of nations and peoples in their historical and contemporary dimensions;
(b) demonstrate knowledge of cultural, social, religious and linguistic differences;
(c) analyze specific international problems illustrating cultural, economic, artistic, humanistic, social, and political differences which affect their solution;
(d) understand the role of a world citizen and the responsibility world citizens share for their common global future.

Category 9: Ethical and Civic Responsibility
(required one course, 3 credits or more)
Goal: To develop students' capacity to identify, discuss and reflect upon the ethical dimensions of political, social, and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others positions, be part of the free exchange of ideas, and function as public minded citizens.

Students will be able to:
(a) examine, articulate, and apply their own ethical views;
(b) understand and apply core concepts (e.g. politics, rights and obligations, justice, liberty) to specific issues;
(c) analyze and reflect on the ethical dimensions of legal, social, and scientific issues;
(d) recognize the diversity of political motivations and interests of others;
(e) identify ways to exercise the rights and responsibilities of citizenship.

Category 10: People and the Environment
(required one course, 3 credits or more)
Goal: To increase students' understanding of today's complex environmental challenges. Students will examine the interrelatedness of human society and the natural environment. Knowledge of both bio-physical principles and psychosocial cultural systems is the foundation for integrative and critical thinking about environmental issues.

Students will be able to:
(a) explain the basic structure and function of various natural ecosystems and of human adaptive strategies within those systems;
(b) discern and analyze patterns and interrelationships of the bio-physical and psycho-social cultural systems;
Students will be able to:
(a) use electronic information technology ethically and responsibly;
(b) access and retrieve information through electronic media, evaluating the accuracy and authenticity of that information;
(c) create, manage, organize and communicate information through electronic media;
(d) demonstrate a working knowledge of information technology terms and concepts;
(e) understand how computers function and the limits of computation and information technology;
(f) recognize changing technologies and make informed choices in their use.

Course(s) which satisfy this category include:
COMS 100  COMS 110  EET 115  EET 116  POL 105

Cultural Diversity Requirement
All MSU undergraduate students must satisfy a Cultural Diversity (CD) credit requirement for graduation. Students pursuing a baccalaureate degree must take at least two (2) courses and a minimum of six (6) credits from the list of courses designated as Cultural Diversity courses. One CD-Core course and a minimum of 3 credits satisfies the CD requirements for the AA and AS degree. Transfer students that have taken between 33 and 63 credits will be granted up to 3 credits of their CD requirement while transfer students that have taken 64 or more credits or have already received an AA degree will be granted 6 CD credits, satisfying their entire CD requirement.

Two types of courses fulfill the Cultural Diversity requirement:
1. Cultural Diversity Core courses (CD-Core) and
2. Cultural Diversity Related courses (CD-Related). Throughout the following listing of General Education Courses, Cultural Diversity courses are designated with either * for core CD courses or ^ for related CD courses.

Courses must be taken according to the following distribution:
1. At least one course must be taken from the list of courses designated as Cultural Diversity-core;
2. At least two different departments must be represented. Students are encouraged to take more than one core course in completing the CD requirement. For a list of courses, see the book General Education and Cultural Diversity Bulletin 2004-2005, available from the Office of Cultural Diversity.

The Honors Program is designed for undergraduate students who desire an enhanced undergraduate experience. Students in the Honors Program will be offered a variety of educational activities that build upon but are different than the traditional undergraduate program. The Honors Program attempts to provide students with seminars, interdisciplinary offerings, community based activities, and other innovations.

The Honors Program is designed for students who want to pursue active learning and is predicated upon students who are motivated, academically curious, and who want to achieve a high level of excellence during their undergraduate careers. It is for students who are self starters and who need the freedom to pursue their unique interests.

There are three ways in which a student may be eligible for Honors:
1. The Student graduated in the top 10% of his or her high school class or has a composite ACT score of 26;
2. The student graduated in the top 25% of his or her high school class and has a composite ACT score of 24. In addition the student will petition the Honors Program with his or her potential for success in the Program.
3. The students has completed two semesters of college level work with a minimum GPA of 3.2. In addition the student will petition the Honors Program with his or her potential for success in the Program.

Success in the Honors Program consists of meeting the four Learning Outcomes for the Honors Program, and achieving a minimum cumulative GPA of 3.3 upon graduation (customarily 3.0 after freshman year, 3.1 after sophomore year, and 3.2 after junior year.)

To complete the Honors Program (minor), students complete a minimum of 18-24 credits:
9 credits of the following:
HONR 201/401 (1-3) Honors Seminars
6 credits of the following:
HONR 250/450 (1-6) Service–Learning
HONR 255/450 (1-6) Practicum
And the following:
HONR 475 (1) Honors Portfolio
HONR 495 (2-4) Senior Project

Students must also graduate with a minimum cumulative GPA of 3.3, and must meet all four Honors Program Learning Outcomes.

Satisfaction of the Learning Outcomes is articulated in the student’s Honors Portfolio, an ongoing project for each student, which is typically culminated during the senior year.

• Area 1 – Civic Engagement Outcomes
1. Students will demonstrate leadership roles in university and wider community activities during their participation in Honors.
2. Students will participate in social change activities in the university and wider community.
3. Students will articulate the values that underlie their participation in various leadership activities involving civic engagement.

• Area 2 – Critical and Creative Thinking
1. Students will be effective in using written and oral communication skills both in form and structure.
2. Students will demonstrate strong analytical skills including quantitative and experimental techniques.
3. Students will demonstrate strong creative thinking skills.
4. Students will demonstrate the ability to investigate problems new to themselves, draw conclusions, and evaluate source materials utilized in these investigations.

• Area 3 – Lifelong Learning
1. Students will demonstrate the ability to take responsibility for their own learning by teaching others a skill or concept.
2. Students will demonstrate the ability to reflect thoughtfully on one’s own learning and doing.
3. Students will identify a deficiency or weakness in their educational background and devise a strategy for responding creatively to that weakness or deficiency.

• Area 4 – self and Other
1. Students will be able to interact respectfully with those from different backgrounds and perspectives.
2. Students will demonstrate the ability to reflect on his or her own self and his or her relationships to others.
