## Dental Hygiene
### College of Allied Health & Nursing
Department of Dental Hygiene
3 Morris Hall • 507-389-1313
Dental Clinic • 507-389-2147
E-mail: www.dentalclinic@mnsu.edu
Dept. Web site: mnsu.edu/dental-hygiene
Chair: Lynnette Engeswick
Terri Brown, Briquette Cooper, Lynnette Engeswick, Lisa Fleck, Nancy Geistfeld, Angela Monson

The dental hygiene curriculum is designed to provide opportunities for the student to develop a sound clinical and theoretical foundation for the practice of dental hygiene. The graduate is prepared to fulfill the dental hygiene roles as clinician, change agent, educator, researcher and consumer advocate as put forth by the American Dental Hygienists’ Association.

The program is designed to meet the American Dental Association’s Commission on Dental Accreditation Standards for Dental Hygiene, and offers a Bachelor of Science degree upon completion.

### Admission to Major
Application for admission to the Dental Hygiene program is a separate process in addition to being admitted to the University. It is highly recommended to meet with a Dental Hygiene advisor to formulate a plan of study as soon as possible. Requirements for application for admission to the dental hygiene major include:

1. Completion of at least 36 semester credits.
2. A minimum career grade-point average of 2.5.
3. Successful completion of prerequisites of SPEE 100 or 102, ENG 101, PSYC 101, SOC 100 or 101, BIOL 220, MATH 112 and two of these three courses: BIOL 270, BIOL 230, or CHEM 111, and DHYG 100.

The application form may be obtained from the Dental Hygiene Department Secretary. The number of students admitted each fall semester is limited to 24 students admitted each fall semester. Applicants are accepted primarily based on academic achievement in prerequisite courses with an emphasis placed on the science prerequisites.

### Dental Hygiene BS
#### Required General Education (33 credits):

- ENG 101 Composition (4)^
- SPEE 100 Fundamentals of Speech Communication (3) OR
- SPEE 102 Public Speaking (3)^
- CHEM 111 Chemistry of Life Processes (5)^
- BIOL 270 Microbiology (4)^
- PSYC 101 Psychology (4)^
- SOC 100 Social Problems (3) OR
- SOC 101 Introduction to Sociology (3)^
- HLTH 101 Health and the Environment (3) ~
- PHIL 222 Medical Ethics (3) OR
- PHIL 120 Introduction to Ethics (3) ~
- MATH 112 College Algebra (4)^

**Recommended for major**

- COMS 100 Introduction to Comp Science (4)

**Required for Major (18-19 credits):**

- BIOL 220 Human Anatomy (4)^
- BIOL 230 Human Physiology (4)^
- DHYG 100 Perspectives in Dental Hygiene (1)^
- FCS 240 Nutrition I (3) ~
- HLTH 321 Medical Terminology (3) ~

**Choose one course from the following:**

- HLTH 475 Biostatistics (3)
- PSYC 201 Statistics for Psychology (4)
- SOC 202 Introduction to Social Statistics (3)
- ECON 207 Business Statistics (4)

**Required Electives:**

Electives to yield a total of 128 semester credits are required.

### POLICIES/INFORMATION

**P/N Grading Policy.** All courses required for Dental Hygiene must be taken for a letter grade and a letter grade of C or higher must be achieved. A grade of D or F in a Dental Hygiene course will result in academic suspension from the program. Completion of course numbers 326 forward requires successful completion of previous Dental Hygiene courses obtaining a “C” or better in order to continue in the Dental Hygiene program.

**Costs:** A student in the dental hygiene program should be prepared to spend about $300 each semester for books and supplies. An additional $2,200+ will be spent for instruments, gloves, uniforms, etc. Approximately 50 percent is paid before beginning the program. Upon acceptance to the program a deposit of $100 is required. The remainder is due in July of the same year.

Dental hygienists are at risk for exposure to blood borne pathogens (BBP). Accepted students will be required to be vaccinated against hepatitis B and will also be required to have their blood tested following any exposures to BBP through needle sticks, cuts or splashes that occur at the MSU Dental Clinic or any off-site clinical sites. Currently the vaccine series costs approximately $150. Students must successfully complete a CPR course prior to enrolling fall semester.

### COURSE DESCRIPTIONS

**DHYG 100 (1) Perspectives in Dental Hygiene**

This course will give the student an introduction to Dental Hygiene as a profession and career. Exploration of dental hygiene practice and an overview of the dental hygiene curriculum and conceptual framework will be covered.

**DHYG 311 (3) Preclinical Orientation**

This course includes an introduction to dental terminology and clinical aspects of dental hygiene treatment including care and use of equipment/instruments, infection control and preparation of patient records. Pre: Admission into Dental Hygiene and Dental Terminology packet F

**DHYG 313 (3) Clinical Skills Development**

This course will teach the operative techniques needed to perform oral prophylactic procedures and health education through laboratory/practice. Pre: Admission into Dental Hygiene F

**DHYG 319 (2) Head and Neck Anatomy and Histology**

Head and Neck Anatomy is the study of the hard and soft tissues of the head and neck including bones, muscles, nerves, blood supply, glands and how they function. Oral Histology is the study of cells and cell layers which compose basic tissues, oral mucosa, gingival and dentogingival tissues, orofacial structures, enamel, dentin and pulp.

**DHYG 321 (3) Radiography I**

This course includes production of dental radiographs, physics of x-
radiation, biologic effects, interpretation, processing, mounting, and laboratory practice on mannequins and patients. Special attention is given to infection control, safety precautions, and patient selection. Pre: Admission into Dental Hygiene  F

DHYG 332 (2) Biomaterials I
This course is the first of two courses that studies the fundamental elements, purposes and uses of dental materials in the modern dental office. In addition it will give the dental hygiene student a fundamental understanding and skill level of basic dental assisting techniques utilized in the dental office.

DHYG 325 (2) Oral Anatomy
This course includes the study of the permanent, mixed and primary dentitions including each individual tooth's morphology, function and occlusion. Pre: Admission into Dental Hygiene  F

DHYG 326 (2) Biomaterials II
This course is the second of two courses that studies the fundamental elements, purposes and uses of the materials used in the modern dental office. The student will develop laboratory or clinical competency in functions using dental materials that are legal duties for Minnesota dental hygienists.

DHYG 327 (2) Periodontology I
This course includes study of supporting tooth structures, identification, classification, etiology, progression and treatment of periodontal diseases. S

DHYG 328 (2) Radiography Interpretation
This course will study the normal anatomical features from intraoral and extraoral radiographs. Students will then use this knowledge to interpret what is seen on radiographs to discern normal from abnormal. Interpretation of dental caries, periodontal disease and pathology are among the topics this course will cover.

DHYG 329 (3) Oral Embryology and Pathology
Oral Embryology encompasses development of human body from conception through birth, with a focus on development of the face and hard and soft tissues of the oral cavity. Oral Pathology addresses the causes and mechanisms of disease with special emphasis on common oral lesions and neoplasms, stressing their etiology and clinical manifestations.

DHYG 331 (2) Clinical Dental Hygiene I
This course provides an opportunity for dental hygiene students to develop their roles as educators, clinicians, consumer advocates, change agents, researchers, and administrators in a clinical setting. S

DHYG 332 (2) Clinical Seminar I
This course includes the study of treatment planning, oral health education, ultrasonic scalers, cardiology, sealants, and new products. Library use and writing a research paper are also included. S

DHYG 333 (2) Clinical Dental Hygiene IS
This course offers the student continued practice of dental hygiene treatment procedures in the MSU Dental Clinic. SS

DHYG 334 (1) Dental Computer Software Management
This course is designed to equip the dental hygiene students with the skills necessary to manage a dental computer software program. A focus on networking, dental resource codes and insurance protocol will also be covered.

DHYG 340 (1) Local Anesthesia
This course is designed to be a study of the fundamental elements, purposes, and uses of local anesthesia for the dental hygiene student.

DHYG 341 (3) Clinical Dental Hygiene II
This course offers the student continued practice of dental hygiene treatment procedures in the MSU Dental Clinic. It includes several mandatory off-campus experiences. F

DHYG 342 (1) Clinical Seminar II
This course focuses on clinical procedures, educational techniques and legal and ethical issues as they apply to the patient-dental hygiene provider relationship. F

DHYG 343 (3) Pharmacology
Pharmacology is the study of drugs used in dentistry or medicine for the treatment, prevention and diagnosis of disease. F

DHYG 344 (1) Nitrous Oxide Sedation
The course is designed to be a study of the fundamental elements, purposes and uses of nitrous oxide sedation in the practice of dental hygiene. This course meets the educational criteria established by the Minnesota Board of Dentistry.

DHYG 345 (3) Community Dental Health
This course introduces second year dental hygiene students to the disciplines and basic principles of community dental health, epidemiologic methods and biostatistical measurement analysis. Preventive oral health measures and program development is included to provide a background for the practical application of dental public health methods to the community. F

DHYG 346 (1) Dental Hygiene Jurisprudence and Ethics
This course focuses on legal and ethical issues as applied to the patient-dental hygiene provider relationship.

DHYG 347 (2) Periodontology II
Didactic and clinical study of etiology, diagnosis, preventive and therapeutic procedures involved with periodontal disease. F

DHYG 348 (1) Teledentistry Technology
This course is designed to prepare the dental hygiene student in the use of new technologies in the modern dental office. Students will learn to integrate these new technologies into the teledentistry model.

DHYG 349 (3) Clinical Dental Hygiene III
This course offers the student continued practice of dental hygiene treatment procedures in the MSU Dental Clinic. It includes several mandatory off-campus experiences. S

CD-Related

DHYG 350 (2) Clinical Seminar III
This course focuses on the development of a personal sense of responsibility for the well-being and development of one's workplace from an employee perspective. S

DHYG 351 (2) Community Practicum
This course focuses on the role of dental hygiene practitioners in
promoting optimal oral health at the individual level and in the community.

DHYG 437 (2) Dental Management of the Medically Compromised Patient
The course is designed to provide the dental hygiene practitioner with a survey of common medical disorders that may be encountered in a dental practice. The medical problems are organized to provide a brief overview of the basic disease process, etiology, incidence, prevalence, behavior characteristics, medications and oral manifestations commonly presented by the dental patients. As a result of the accumulation of evidence based research, the severity of the common medical disorders and make a dental management decision providing the patient with the highest possible level of oral health.

DHYG 438 (1) Advanced Community Practice I
The first of two clinical courses designed to utilize the assessment, planning, implementation and evaluation process in a community based setting. This course will address efforts to reduce incidence and severity of oral diseases resulting in improved access to community oral health in complex cases.

DHYG 439 (1) Advanced Community Practice II
This is the second of two clinical courses designed to utilize the assessment, planning, implementation and evaluation process in a community based setting. This course will address efforts to reduce incidence and severity of oral diseases resulting in improved access to community oral health in complex cases.

DHYG 440 (4) Restorative Functions
This elective course meets the requirements of the Minnesota Board of Dentistry for dental hygienists and assistants to legally perform new expanded duties including the placement, contouring and adjustment of amalgam, glass ionomer and composite restorations and the placement and adjustment of stainless steel crowns.

DHYG 499 (1-6) Individual Study
