Chair: Dr. Bruce E. Jones, Ph.D.
Guangshu A. Change, Ph.D., Craig Evers, Ph.D., P.E., Andrzej Markowski, Ph.D., Gary Mead, Ph.D., Harry Petersen, Ph.D., P.E., Paul Sullivan, Ph.D., P.E.

The mission of the Automotive Engineering Technology (AET) degree program at Minnesota State Mankato, is to provide a broad-based education for graduates to enter globally competitive automotive careers to serve the citizens of Minnesota, and the world by:

- providing the highest quality education to prepare application-oriented graduates for a broad range of career opportunities in product research, design, development, and technical sales environments;
- encouraging and supporting faculty and students to engage in scholarly research and activities through partnerships with government, industry, and other constituencies that support effective and ethical transfer of technology;
- providing access to state of the art equipment, facilities, and methodologies, along with faculty expertise to benefit AET students; and
- broadening access to the program for diverse populations and support of K-12 pipeline development.

Program Description. The Automotive Engineering Technology (AET) degree program awards a Bachelor of Science degree (BS) to successful students through a four-year curriculum.

Engineering technology has been defined as the part of the technological field which requires the application of scientific and engineering knowledge and methods combined with technical skills in support of engineering activities; it lies in the occupational spectrum between the craftsman and the engineer at the end of the spectrum closest to the engineer. Engineering technology is oriented less toward theory and more toward practical applications. - American Society of Engineering Education (ASEE).

The Automotive Engineering Technology degree program prepares graduates for careers in product research, design and development, manufacturing, and technical sales in the original equipment and aftermarket industries. Fields include passenger cars, trucks, motorcycles, recreational vehicles, vehicle emissions, safety, fuels and lubricants, construction, industrial, and agricultural equipment. Graduates from the program are currently working for original equipment manufacturers (OEMs), such as General Motors, Polaris, John Deere, AGCO, and Ford along with aftermarket companies such as Competition Cams, OTC, and S&S Cycle. A more complete reference to companies employing AET graduates may be obtained from the Department Chair.

The Society of Automotive Engineers (sae.org) and National Institute of Automotive Service Excellence (ase.com) are the lead professional societies used in developing program criteria, guiding program relevance, and making continuous improvement.

The primary goal of the AET program is to provide all graduates with the solid technical foundation necessary to insure their success in a wide variety of employment opportunities. To accomplish this goal, program outcomes and objectives are defined and assessed for continuous improvement. They are as follows:

Program Outcomes. Students at the time of graduation are prepared to:

1. apply knowledge of science, math, statistics, and engineering technology to solve problems encountered in a professional career in the automotive industry.
2. design, analyze and build virtual and real models, and conduct testing in product development environments through applied computer technologies.
3. define and communicate a set of requirements for a system, component or process and develop solutions to satisfy given criteria in an optimal fashion using creativity in design.
4. function effectively as a manager, leader, or member of a team.
5. understand and practice professional, ethical, environmental, and global responsibilities.
6. communicate effectively across all design and management interface levels of an organization.
7. recognize the need for and then develop the skills for life-long learning.
8. understand and engage in behavior which respects diversity and global cultures
9. practice timeliness and quality with regard to work requirements

Program Objectives. AET graduates two to three years into their careers should have the foundation to:

1. deliver products, services, and support to both internal and external organizations by applying technical knowledge, problem solving techniques and hands-on skills in traditional and emerging technologies.
2. actively participate in on-going professional development, professional growth, and increasing professional responsibility.
3. effectively communicate ideas to technical and non-technical people.
4. perform in or manage cross-functional teams.
5. work within the accepted standards of professional integrity and conduct.
6. design, analyze, build, and test virtual or real models in product development and continuous improvement environments.
7. implement, and continuously improve cost, quality, time, and goals using world class management methodologies.

Accreditation. The AET degree program is accredited by the Technology Accreditation Commission (TAC) of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, Phone: 410-347-7700, Fax: 410-625-2238, e-mail: tac@abet.org, web: http://www.abet.org.

Admission to the AET major is granted by the AMET Department. Admission to the major is required to register for 300-level courses. Minimum requirements for acceptance into the AET major include a cumulative GPA of 2.0 or higher and the completion of the following courses with a grade of "C" (2.0) or higher: AET 102, AET 160, AET 261, AET 262, CMST 100 or CMST 102, EET 113, ENG 101, MET 142, MET 144, MET 177, MATH 121, PHYS 211.

POLICIES/INFORMATION

GPA Policy. A GPA of 2.5 or higher in courses is required for the major or minor in Automotive Engineering Technology is a requirement in order to proceed in the program sequence and graduate. This GPA calculation is based on the following areas: Required Communications; Required Basic Science and Mathematics; Required Major and Required Elective Courses. Refer to the College of Science Engineering and Technology Student Advising Center regarding required advising for students on academic probation.

Department Grade Policy. All courses in the AET major, and the required Communications, Basic Science and Mathematics courses must be completed with a grade of “C” or better.

P/N Grading Policy. No more than 1/4 of all undergraduate credits may be P/N, except those courses offered P/N only.

2010-2011 Undergraduate Bulletin
Residency. A minimum of 50 percent of the credits for a major or minor in Automotive Engineering Technology must be taken at Minnesota State Mankato.

Prerequisites and corequisites must be observed unless written permission is obtained from the instructor and the Department of AMET. A flow chart of prerequisites is available at the Department Office.

The scheduling of all department courses is done bi-annually, based on enrollment and staffing. To obtain a current class schedule, contact the Department.

**AUTOMOTIVE ENGINEERING TECHNOLOGY BS**

**Required General Education**
CHEM 104 Introduction to Chemistry (3)
CMST 100 Fund. of Speech Communication (3) OR CMST 102 Public Speaking (3)
ENG 101 Composition (4)
MATH 112 Calculus I (4)
PHYS 211 Principles of Physics I (4)
STAT 154 Elementary Statistics (3)

Please see advisor for additional General Education requirements.

**Pre-requisites for Major**

AET 102 Introduction to Automotive Engineering Technology (1)
AET 160 Automotive Technology & Systems (4)
AET 261 Automotive Driveability & Diagnosis (4)
AET 262 Automotive Computers and Electronics (4)
EET 113 DC Circuits (3)
ENG 101 Composition (4)
MET 142 Computer Aided Design (3)
MET 144 Product Development & Design (3)
MET 177 Materials Processing I and Metallurgy (4)
CMST 100 Fund. of Speech Communication (3) OR CMST 102 Public Speaking (3)

**Major Common Core**

AET 334 Fluid Power (3)
AET 364 Chassis Design and Performance Testing (4)
AET 366 Automotive Thermodynamics and Engine Design (3)
AET 378 Composite Materials (3)
AET 387 Junior Design Project (1)
AET 465 Automotive Laboratory Experience (2)
AET 468 Automotive Research Methods (4)
AET 488 Senior Design Project I (3)
AET 489 Senior Design Project II (3)
MET 323 Statics (3)
MET 324 Strength of Materials and Dynamics (3)
MET 341 Advanced Computer Aided Design (4)
MET 424 Industrial Safety (2)

**Major Restricted Electives**

CS 171 Introduction to C++ Programming (2)
ENG 271 Technical Communication (4)
MATH 127 Calculus II for Engineering Technology: Integration (2)
PHYS 212 Principles of Physics II (4)

**Required Minor: None**

**AUTOMOTIVE ENGINEERING TECHNOLOGY MINOR (16 Credits)**

**Required for Minor (9 credits)**

AET 102 Introduction to Automotive Engineering Technology (1)
AET 160 Automotive Technology & Systems (4)
AET 261 Automotive Driveability and Diagnosis (4)

**Additional Required Electives for Minor (7 credits)**

Choose 7 credits of AET/MET courses from major core courses.

---

**COURSE DESCRIPTIONS**

**AET 102 (1) Introduction to Automotive Engineering Technology**

An overview of careers, technology and requirements of the Automotive Engineering Technology program. Careers in engineering technology are examined along with professional organizations and ethics.

Fall, Spring

**AET 160 (4) Automotive Technology & Systems**

This course is centered on the theory, operation and service of the systems found in modern automobiles. Lectures and demonstrations cover the core topics and open lab sessions allow students to practice procedures on their own vehicles in the completion of course assignments.

Pre: MATH 112 or higher

Fall, Spring

**AET 261 (4) Automotive Driveability and Diagnosis**

This course focuses on the engine's mechanical, ignition, fuel, and emission systems including the diagnosis of problems using a system approach. Testing equipment used in the course includes: fuel and fuel system; emission system; ignition oscilloscopes; crack detection diagnostic equipment.

Pre: AET 102, AET 160, MATH 113

Fall, Spring

**AET 262 (4) Automotive Computers and Electronics**

This course is centered on the theory, components, and diagnostic procedures related to modern automobile electrical and electronic systems. The major emphasis of the course involves the computer, sensors, and actuators as used in vehicles to control the ignition, fuel, emission, ABS, and chassis systems.

Pre: AET 261, EET 113

Fall, Spring

**AET 334 (3) Fluid Power**

Course provides a fundamental understanding of the physical principles of fluid power, along with a practical working knowledge of the components utilized in designing, installing, operating, and maintaining hydraulic and pneumatic power systems.

Pre: MATH 121, PHYS 211

**AET 364 (4) Chassis Design and Performance Testing**

This course is an exploration of the theory and design of chassis systems, in addition to evaluation of these designs. Research tools include software design simulators, chassis geometry gauges, and dynamometers.

Pre: AET 262, CS 171, MATH 121, PHYS 211

Fall, Spring

**AET 366 (3) Automotive Thermodynamics and Engine Design**

This course focuses on the study of thermodynamics as it relates to internal combustion engines and their design. Static and dynamic engine measurements are thoroughly covered along with an introduction to fuel cell and hybrid applications. Thermochemistry topics are covered including fuel characteristics, mixture ratios and emission characteristics.

Pre: AET 262, CHEM 104, MATH 121

**AET 378 (3) Composite Materials**

Fiber reinforced plastic composite materials used in the manufacturing and transportation industries are the focus of this course. Matrix and reinforcement materials are examined and their properties identified. Manufacturing methods, fabrication, assembly techniques, testing, repair, and design of composite products are covered.

Pre: MET 177, MET 324, CHEM 104

Fall, Spring

---
**AET 387 (1) Junior Design Project**
An examination of automotive design and research along with a review of topics such as ethics, professionalism, measurement, statistics, and career development/placement. This course prepares the student for AET 488, Senior Design Project I, where the design proposal, design project and final report are completed.
Pre: ENG 271, MET 144, STAT 154
Spring

**AET 435 (1-4) Automotive Design and Construction**
Focuses on the design and construction of prototype vehicles. Topics include: vehicle design decisions, rules, budgets, chassis design, body and aerodynamics, drivetrain choices, construction techniques, and test procedures. An experimental vehicle will be built in the course. May be repeated.
Pre: Permission Required
Fall, Spring

**AET 465 (2) Automotive Laboratory Experience**
This course designed to provide experience in management, organization, supervision, and maintenance in a laboratory environment. Enrollment is limited. Sign up at least two semesters ahead.
Pre: AET 364, Permission required
Fall, Spring

**AET 468 (4) Automotive Research Methods**
Automotive research techniques and equipment form the basis for this course. Environmental measurement, airflow testing, dynamometer testing, emission measurement and fuel efficiency testing is covered. Emphasis is placed on research procedures, data acquisition and interpretation.
Pre: AET 334, AET 364, AET 366, PHYS 212, MATH 127, STAT 154
Fall, Spring

**AET 488 (3) Senior Design Project I**
The first of a two course sequence where students carry out their capstone design project. Weekly meetings are scheduled where the design team carries out the tasks required for completion. Formal design presentations and research papers are presented at the end of the course.
Pre: AET 364, AT 387, MET 324
Fall

**AET 489 (3) Senior Design Project II**
The second of a two course sequence where students build upon the first semester's work. The course culminates with the completion of the capstone project with a formal technical paper following SAE format that would be ready to be submitted for publication.
Pre: AET 468, AET 488
Spring

**AET 492 (1-4) Automotive Seminar**
Selected automotive topics.
Pre: Permission required
On-demand

**AET 497 (1-10) Internship: Automotive**
Automotive work experience in an area pertinent to the student’s career objectives. Consent of internship coordinator required prior to the beginning of employment and registration. Typically done between the junior and senior year.
Pre: 40 earned credits in AET/MET
Fall, Spring, Summer

**AET 499 (1-4) Individual Study**
Pre: Permission required
