Civil Engineering

College of Science, Engineering and Technology
Department of Mechanical & Civil Engineering
205 Traficin Science Center E • 507-389-6383
Fax 507-389-5002
Website: ce.mnsu.edu

Chair: Aaron S. Budge, Ph.D., P.E.
Vance Browne, Ph.D.; Aaron S. Budge, Ph.D., P.E.; Stephen J. Druschel, Ph.D., P.E.; Charles W. Johnson, Ph.D., P.E.; Saeed Mohseni, Ph.D., P.E.; Omid Mohseni, Ph.D., P.E.; Ken Saffert, P.E.; Chad Surprenant, P.E.

Adjunct Faculty: Herman A. Dharmarajan, Ph.D., P.E., DEE; William R. Douglass, P.E.; Charles W. Johnson, Ph.D., P.E.; Patrick A. Tebbe, Ph.D., P.E.; W. James Wilde, Ph.D., P.E.

Ph.D., P.E.; Ken Saffert, P.E.; Chad Surprenant, P.E.

Other important features of an education in civil engineering at Minnesota State Mankato include:

• Students work closely with engineers from design firms and government agencies and with faculty and students from other engineering courses in the senior design project.
• Students are required to take a department-administered diagnostic test in their junior year. The purpose of this test is to provide feedback which will be used to strengthen the curriculum and to improve the preparation of students.
• Students are required to take the Fundamentals of Engineering exam in their senior year – the first step towards professional registration.
• The flexible curriculum allows the students to have either a diverse or focused civil engineering study.
• The faculty maintains ties to industry, thereby keeping current with new technologies, design methodologies, and the world of civil engineering practice – a valuable resource for students.

Preparation. Recommended high school preparation is two years of algebra, one year of geometry, one-half year of trigonometry, one-half year of college algebra, and a year each of physics and chemistry. Computer skills such as word processing, spreadsheets, and presentations are also recommended. Without this background it may take longer than four years to earn the degree.

Program Admission. Admission to the Civil Engineering Program is granted by the department, and is necessary before enrolling in 300- and 400-level courses. Near the end of the sophomore year, students must submit an application for admission to the civil engineering program. Applications to the program may be obtained from the Department of Mechanical and Civil Engineering or downloaded from the department homepage.

Before being admitted to upper-division civil engineering courses, a student must complete a minimum of 48 credits, for grade, including the following core courses: calculus-based physics, 8 credits; calculus and differential equations, 16 credits; introduction to engineering, 2 credits; computer graphics, 2 credits; introduction to problem solving and civil engineering design, 2 credits; engineering mechanics (statics, dynamics, and mechanics of materials), 9 credits; chemistry, 5 credits; and English composition, 4 credits. Provisional admission to the program for one semester may be granted in limited cases.

To be considered for admission a grade of “C” or better must be achieved in each course listed above, and a student must have a cumulative GPA of 2.50 in the core courses. All core courses (including those for repeated courses) will be considered in the computation of the GPA for admission to the program.

Transfer Students. The department makes a special effort to accommodate transfer students. Transfer students are encouraged to contact the department as soon as possible to facilitate a smooth transition. Please feel free to write, call, or visit the department. Generally, no transfer credits are allowed for upper-division civil engineering courses. For exceptions to this policy, special written permission must be obtained and will be reviewed by the department. Transfer students must take a minimum of 12 credits at Minnesota State Mankato prior to being considered for full admission to the program.

For transfer students, the distribution of credits specified for the core courses may vary, but the total credits must satisfy departmental transfer requirements. Transfer credits are not normally used in the computation of the GPA for admission to the program. Transfer students should refer to the Supplemental Information in the Undergraduate Bulletin for information about procedures to be followed when applying for admission to the University.

POLICIES/INFORMATION

Satisfactory Progress. Once admitted to the civil engineering program, a student must maintain satisfactory progress by: (1) maintaining a cumulative GPA of at least 2.30 for all upper-division engineering courses; and (2) achieving a GPA of at least 2.00 each semester for all courses required for the major. All courses, including repeated courses, will be used in the GPA calculations above.
CIVIL ENGINEERING

P/N Grading Policy. P/N credit will not be applied to any course used to meet civil engineering degree requirements.

Probation Policy. Once admitted to the program, a student who does not maintain satisfactory progress as defined above will be placed on program probationary status for a maximum of one semester. During the probationary period, the student must complete at least 8 credits, approved by the department, of upper division engineering courses for grade from the prescribed Civil Engineering curriculum; and (b) shall not receive a degree without first conforming to the satisfactory progress criteria. A student who fails to meet satisfactory progress for a second semester (consecutive or non-consecutive) will not be allowed to continue in the program. The student may later apply for admission to the program. If readmitted, only probationary status will be granted, and continuation in the program will be based on performance in courses specified in a contract with the department.

Appeals. A student may appeal any departmental decision in writing. The department will consider such appeals individually.

CIVIL ENGINEERING BSCE

Required Special General Education (23 credits)
The Bachelor of Science in Civil Engineering degree does not adhere to the standard general education program required by other majors. Rather, it requires a special distribution of communication, humanities, and social science courses. Courses may be chosen to satisfy the university cultural diversity requirement concurrently.

Required Humanities and Social Science Courses
(minimum of 16 credits)
To satisfy this requirement, the courses selected must provide both breadth and depth and not be limited to a selection of unrelated introductory courses. Each student should discuss with his/her civil engineering advisor on the selection of courses to meet this requirement early in their academic career. A current list of acceptable courses is posted in the department office and on the department website.

Specifically, the minimum requirements consist of (a) at least 6 credits in the humanities area, and (b) at least 9 credits in the social science area, of which 3 credits must be either microeconomics or macroeconomics; (a) and (b) must total at least 16 credits.

To provide the measure of depth to the course of study, at least 3 credits at the 300-level or above must be included in the 16 credit requirement. At least one upper division course must follow a course in the same subject area.

Required Communication Courses (7 credits)
ENG 101 Composition (4) AND
CMST 102 Public Speaking (3) OR
ENG 271 Technical Communication (4)

Science and Mathematics (33 credits)
MATH 121 Calculus I (4)
MATH 122 Calculus II (4)
MATH 223 Calculus III (4)
MATH 321 Ordinary Differential Equations (4)
CHEM 201 General Chemistry I (5)
PHYS 221 General Physics I (4)
PHYS 222 General Physics II (3)
PHYS 232 General Physics II Lab (1)
Science Elective from approved list (4)

Basic Engineering Science (25 credits)
CIVE 101 Introduction to Engineering-Civil (2)
CIVE 145 CAD for Civil Engineering (2)
CIVE 201 Intro. to Problem Solving and Civil Engineering Design (2)
CIVE 271 Civil Engineering Measurements (2)
ME 206 Materials Science (3)
CIVE 212 Statics (3) OR
ME 212 Statics (3)
CIVE 214 Dynamics (3) OR
ME 214 Dynamics (3)
CIVE 223 Mechanics of Materials (3) OR
ME 223 Mechanics of Materials (3)
ME 299 Thermal Analysis (2) OR
ME 241 Thermodynamics (3)
ME 291 Engineering Analysis (3)

Upper Division (45 credits)
CIVE 321 Fluid Mechanics (3) OR
ME 321 Fluid Mechanics (3)
CIVE 340 Structural Analysis (3)
CIVE 350 Hydraulics and Hydrology (4)
CIVE 360 Geotechnical Engineering (4)
CIVE 370 Transportation Engineering (4)
CIVE 380 Environmental Engineering (3)
CIVE 401 Civil Engineering Design I (2)
CIVE 402 Civil Engineering Design II (3)
CIVE 435 Civil Engineering Experimentation I (2)
CIVE 436 Civil Engineering Experimentation II (2)
CIVE 446 Reinforced Concrete Design (3) OR
CIVE 448 Steel Design (3)
CIVE electives (minimum 9 credits)

Technical electives from approved list (minimum 2 credits)

Required Minor: None.

Civil, Science and Technical Electives
A civil engineering student is required to choose a minimum of 18 credits in civil, science and technical electives: science elective (minimum 4 credits), technical electives (minimum 2 credits), and CIVE electives (minimum 9 credits). The science and technical electives are recommended to be taken after the student has identified his/her area of interest and in consultation with his/her academic advisor. Science and technical electives must be selected from the approved list below.

Approved Science Electives
BIOL 105 General Biology I (5)
CHEM 202 General Chemistry II (5)
ENVR 101 Perspectives in Environmental Science (4)
GEOL 121 Physical Geology (4)

Approved Technical Electives
All CIVE courses except required courses
All EE courses 300-level and above and EE 230 (Circuit Analysis I)

All ME courses 300-level and above except required courses
BIOL 270 Microbiology (4)
BLAW 450 Contracts, Sales and Professional Responsibility (3)
BLAW 453 International Legal Environment of Business (3)
BLAW 474 Environmental Regulation and Land Use (3)
BLAW 476 Construction and Design Law (3)
CHEM 305 Analytical Chemistry (4)
CHEM 407 Water Chemistry (3)
ENVR 440 Environmental Regulations (3)
ENVR 450 Environmental Pollution & Control (3)
ENVR 460 Analysis of Pollutants (4)
GEOL 330 Structural Geology (4)
GEOL 351 Engineering Geology (2)
GEOL 450 Hydrogeology (3)

2011-2012 Undergraduate Bulletin
CIVIL ENGINEERING

COURSE DESCRIPTIONS

CIVE 101 (2) Introduction to Engineering - Civil
To prepare the students for a career in engineering with some emphasis in civil; introduce the engineering fundamentals and the skills necessary to have a successful learning experience; and to prepare students for engineering education and profession through interactions with upper-class engineering students and practicing engineers.

CIVE 145 (2) CAD for Civil Engineering
Basic computer applications for drafting and designing civil engineering projects. Basic orthographic construction and projections, and development of different types of drawings - sections, plan and profile, and construction details.

CIVE 201 (2) Intro. to Problem Solving and Civil Engineering Design
Introduction to the design concepts of civil engineering projects including presentations, codes and standards, construction drawings, and public hearing; problem solving skills for civil engineering analysis and design including the use of appropriate computational tools and programming logic. This course includes laboratory component. Pre: CIVE 101, Co-Req: CIVE 145, MATH 121
Fall, Spring

CIVE 212 (3) Statics
Same as ME 212.

CIVE 214 (3) Dynamics
Same as ME 214.

CIVE 223 (3) Mechanics of Materials
Same as ME 223.

CIVE 271 (2) Civil Engineering Measurements
Basic civil engineering measurements as relates to construction layout, including distances, angles, bearings, elevations, mapping, and positioning. The course includes laboratory component. Pre: MATH 115
Co-req: MATH 121 or instructor consent

CIVE 293 (1) MAX Scholar Seminar
This class provides MAX scholars with an opportunity to explore a set of topics related to achieving success in academic, professional and personal realms. Speakers will include faculty, graduate students, visiting researchers and industry members as well as student participants. Students will be required to participate in mentoring of lower division MAX scholarship recipients and provide written and oral presentations of various topics during the semester. This course may be repeated and will not count towards graduation requirements. Pre: Recipient of a MAX scholarship or instructor consent
Fall, Spring

CIVE 321 (3) Fluid Mechanics
Same as ME 321.

CIVE 340 (3) Structural Analysis
Analysis of determinate and indeterminate structural systems using classical methods such as consistent displacements, energy method, slope-deflection and moment distribution. Use of computer software is expected. Pre: ME 223 / CIVE 223

CIVE 350 (4) Hydraulics and Hydrology
Concept of hydraulics such as pipe flow and open channel flow. Hydrologic principles such as weather patterns; precipitation measurement and distribution, abstractions, and runoff; storm hydrograph and peak flow analysis. Design includes flood design, reservoir and channel routing. Pre: ME 321, CIVE 321, ME 291

CIVE 360 (4) Geotechnical Engineering
Study of soil behaviors and their classifications; index properties. Applications of mechanics principles to soils as an engineering material, consolidation theory, compaction theory, effective stresses, shear strength; earth pressure and slope stability. Elements of foundation designs. Pre: ME 223 / CIVE 223 and Co-req.: ME 321 / CIVE 321

CIVE 370 (4) Transportation Engineering
Introduction to Transportation systems; land use and transportation interaction, planning, and traffic operations; transportation decision making using economic analysis. Introduction to design, construction, maintenance, and operation of various transportation modes. Co: ME 291

CIVE 380 (3) Environmental Engineering
Introduction of the fundamental chemical, biological and physical principles of environment engineering for water and wastewater treatment and distribution systems, solid waste management, air pollution control, and the analysis of air quality, surface water, and ground water. Pre: CHEM 201, MATH 321
Coreq: ME 321 or instructor consent

CIVE 401 (2) Civil Engineering Design I
Practical civil engineering design project with “real world” constraints. This course focuses on the planning and formulation of project, and the presentation of the preliminary findings to the public. Pre: senior civil engineering standing

CIVE 402 (3) Civil Engineering Design II
Practical civil engineering design project with “real world” constraints. Focuses on the engineering analysis, design, and economic analysis of the project. Includes a design lab. Pre: CIVE 401

CIVE 432 (3) Properties of Concrete
Selected studies in the properties and design of concrete mixtures, cement chemistry, concrete durability, specialty concrete construction, admixtures, and quality control. Pre: CIVE 435 or consent of instructor

CIVE 435 (2) Civil Engineering Experimentation I
To provide students with hands-on experience in the testing of civil engineering materials such as concrete and metals and structural systems. The course also provides students with experiments in transportation. This course includes a laboratory. Pre: CIVE 340 & CIVE 370

CIVE 436 (2) Civil Engineering Experimentation II
To provide students with hands-on experience in testing civil engineering materials such as soil and asphalt. The course also provides students with experiments in fluid mechanics, hydraulics, and hydrology. This course includes laboratory. Pre: CIVE 350, CIVE 360

CIVE 446 (3) Reinforced Concrete Design
Design of reinforced concrete beams, columns, slabs and structural foundations. Use of standard specifications is required. Use of computer software is expected. Pre: CIVE 340

CIVE 448 (3) Steel Design
Behavior and properties of structural steel; proportionality of tension members, beams, and columns and design of connections using LRFD specifications. Pre: CIVE 340

CIVE 450 (3) Finite Element Method
Same as ME 450

2011-2012 Undergraduate Bulletin
CIVE 452 (3) Open Channel Flow
Analysis of open channel flow systems. Includes natural channels, designed channels, flow transitions, steady flow, unsteady flow, uniform flow, and non-uniform flow.
Pre: CIVE 350

CIVE 454 (3) Hydraulic Structures
Analysis and design of water regulating structures. Includes dams, spillways, gates, dikes, levees, stilling basins, water distribution systems, and various simpler structures. Environmental impacts of hydraulic structures are discussed throughout the course.
Pre: CIVE 350

CIVE 458 (3) Stormwater Management
Application of fluid mechanics and hydrology to the design of stormwater management facilities.
Pre: CIVE 350

CIVE 461 (3) Fundamentals of Pavement Design
Performance and design of rigid, flexible, and composite pavement structures with emphasis on modern pavement design procedures. Principles of pavement maintenance and rehabilitation, and pavement management systems. Materials characterization, tests, quality control, and life cycle cost analysis.
Pre: ME 223 / CIVE 223, CIVE 360, and CIVE 370

CIVE 465 (3) Foundation Design
Classification of foundations; applications of fundamental soil mechanics to design and analysis of soil-structure systems; design and computer application of shallow and deep foundations, piles and caissons, retaining structures. Introduction to rock mechanics.
Pre: CIVE 360

CIVE 467 (3) Earth Structures
Design and construction of traditional embankments, including slope stability analysis; earth and rock fill dams, including introduction to seepage analysis; excavations, earth retaining structures, and other geotechnical structures. Geotechnical software application in analysis and design.
Pre: CIVE 360
Fall

CIVE 470 (3) Traffic Engineering
Elements of traffic engineering including road use, vehicle and roadway systems; traffic flow theory; traffic studies and data collections; traffic control devices; principles of intersecting signalization; capacity and level of service; analysis of freeways, rural highways and intersections using computer software for traffic operations and management.
Pre: CIVE 370

CIVE 471 (3) Highway Planning and Design
Introduces the classification and design process of highways; development and use of design controls, criteria, and highway design elements; design of vertical and horizontal alignment, and establishment of sight distances; design of cross-sections, intersections, and interchanges.
Pre: CIVE 145 and CIVE 370

CIVE 476 (3) Water & Wastewater Treatment, Collection & Distribution
Overview of municipal water and wastewater treatment and distribution practices. Application of chemical, biological and physical principles to design and the operation of water and wastewater treatment and distribution systems.
Pre: CIVE 380

CIVE 481 (3) Utility Pipeline Inspection, Repair and Rehabilitation
Design and implementation of inspection plans, repairs and rehabilitation of sewer, storm drainage and drinking water supply pipelines. Consideration of performance, logistics and cost implications of all available methods.
Pre: CIVE 380
Variable

CIVE 482 (3) Landfill Design and Hazardous Waste
This course will develop competency in the design and implementation of landfill design and hazardous waste remediation, with understanding of both performance and cost implications to all choices.
Prereq: CIVE 380
Variable

CIVE 484 (2) Landfill Design and Hazardous Waste
This course will develop competency in the design and implementation of landfill design and hazardous waste remediation, with understanding of both performance and cost implications to all choices.
Prereq: CIVE 380
Variable

CIVE 487 (1-6) Internship
Variable

CIVE 493 (1) MAX Scholar Seminar
This class provides MAX scholars with an opportunity to explore a set of topics related to achieving success in academic, professional and personal realms. Speakers will include faculty, graduate students, visiting researchers and industry members as well as student participants. Students will be required to participate in mentoring of lower division MAX scholarship recipients and provide written and oral presentations of various topics during the semester. This course may be repeated and will not count towards graduation requirements.
Pre: Recipient of a MAX scholarship or instructor consent.
Fall, Spring

CIVE 494 (1-6) Individual Study
