### STATISTICS BS AND MINOR

**Statistics**

College of Science, Engineering, & Technology  
Department of Mathematics & Statistics  
273 Wissink Hall • 507-389-1453  
Website: www.cset.mnsu.edu/dept/mathstat/

Chair: Ruijun Zhao, PhD  
Faculty: Hyekyung Min, PhD; Galkande Premarathna, PhD; Mezbahur Rahman, PhD; Han Wu, PhD

Statistics is the mathematical science of studying and learning from data. Statisticians acquire, organize, analyze, present and draw inferences from data. Inferences about a population are communicated with measures of likelihood. Statistical analysis is used in a variety of disciplines to communicate uncertainties for the purpose of making informed decisions. Applications of statistics are all around us such as in weather forecasting, surveys, quality control, market demand, causality, and effectiveness of treatments, to name only a few.

The Department offers a major and minor in statistics. The major provides a sufficient background in statistics, mathematics, and computer science to enable students to pursue a career in business, industry, or actuarial science as well as to pursue advanced study in statistics. The major is organized into 4 tracks to allow an emphasis in actuarial science, applied mathematics, computer science, or biological science. A well prepared student can expect to complete the major in four years. The minor gives students a basic core of statistics that would complement majors in many areas by providing a thorough grounding in basic statistical principles, methods of data analysis, and a knowledge base to assist in understanding statistical procedures applied to a variety of disciplines.

---

#### Academic Map/Degree Plan at [www.mnsu.edu/programs/#All](http://www.mnsu.edu/programs/#All)

#### POLICIES/INFORMATION

A student must be admitted to a major to be permitted to take 300- and 400-level courses. Admission is granted by the department. In addition to minimum university admission requirements of: a minimum of 32 earned semester credit hours and a minimum cumulative GPA of 2.00, students must complete 10 credits in mathematics and statistics counting towards the Major with a 2.5 GPA or higher.

Contact the College of Science, Engineering and Technology Student Relations Office for application procedures.

#### GPA Policy.

Statistics majors and minors must earn a grade of “C” (2.0) or better in all courses applied to the major or minor.

#### Course Application Policy.

Within each major or minor, no course may be applied to more than one requirement.

#### P/N Grading Policy.

All 300- and 400-level courses are offered for grade only with the exception of STAT 498 and STAT 499 which are available for both P/N and letter grade.

#### Credit by Examination.

Credit by examination will not be approved for courses in which a student has already received a grade.

#### Credit Limitation.

A student may not receive credit for STAT 354 or MATH 354 after completing MATH 455 or STAT 455.

Students seeking enrollment in MATH 112 College Algebra, MATH 113 Trigonometry, MATH 115 Precalculus, MATH 121 Calculus I, MATH 130 Finite Mathematics and Introductory Calculus, MATH 201 Elements of Mathematics I, or STAT 154 Elementary Statistics must demonstrate readiness to succeed by satisfying the placement table below.

</tbody>
</table>

*New SAT is June 2016 or later  
**Two digit SAT score is also called the SAT Math Composite Score  
ACT, SAT, and MCA scores are valid for 5 years.

#### Procedures:

Students may substitute for the above requirements based on documentation of:

1. equivalent or higher scores on standardized college admissions tests that report a separate mathematics sub-score within two calendar years;  
2. successful completion of equivalent prior post-secondary education, such as course transfer evaluations or Cambridge International Examinations; or  
3. enrollment exclusively in non-credit courses or programs.

Students requesting such substitutions should submit the documentation to the Chair of the Department of Mathematics and Statistics for evaluation. The evaluation will be based on nationally accepted concordances between the testing instruments and/ or courses. The Chair of the Department of Mathematics and Statistics or designee should respond in writing to student requests within three weeks of receiving them.

#### Procedure for Waiver

1. Students not meeting the requirements for enrollment in Math 112, Math 201, or Stat 154 may request a waiver to this policy.
2. Written requests for waivers to the policy must be submitted to the Chair of the Department of Mathematics and Statistics, and should include evidence of alternate means of demonstrating readiness for college algebra including but not limited to:
   a. High school or recent post-secondary coursework which would indicate adequate preparation (transcripts or other records which include course titles, levels and grades are acceptable), or
   b. Verification of extenuating circumstances which may have affected performance on previous exams.
3. Requests for waivers should be submitted by the following deadlines:
   a. August 5th for fall semester enrollment,
   b. December 1st for spring semester enrollment, and
   c. May 1st for summer session enrollment
4. The Chair of the Department of Mathematics and Statistics or designee should respond in writing to student requests within three weeks of receiving them.
5. Students whose initial requests are denied may submit a written appeal to the Dean of the College of Science, Engineering and Technology. The Dean should respond in writing, with a copy to the Chair of the Department of Mathematics and Statistics.
6. The Dean’s decision is the final step in this appeal process

Policy Rationale: The purpose of the policy is to place students in a course that is developmentally appropriate to help ensure their long term success. Data suggests students not meeting these guidelines have a higher likelihood of having to repeat a course.

STATISTICS

Major Emphasis: Actuarial Track

(Choose 3 - 4 credits)

FINA 460  Actuarial Applications in Probability
FINA 467  Insurance and Risk Management
FINA 460  Investments
FINA 362  Business Finance (3)
FINA 470  Mathematical Theory of Interest (4)

Major Emphasis: Information Technology Track

Minimum 16 credits from the following list
IT 310  Data Structures & Algorithms (4)
IT 320  Machine Structures and Operating Systems (4)
IT 340  Introduction to Database Systems (4)
IT 350  Information Security (4)
IT 360  Introduction to Networking (4)
IT 380  Systems Analysis and Design (4)

MATH 470  Numerical Analysis I (4)

Required Minor: None

STATISTICS MINOR

Core

MATH 121  Calculus I (4)
MATH 122  Calculus II (4)
STAT 354  Concepts of Probability & Statistics (4)
STAT 450  Regression Analysis (3)
STAT 451  Design and Analysis of Experiments (3)

Restricted Electives (Choose 3 - 4 credits)

STAT 455  Theory of Statistics I (4)
STAT 457  Sample Survey, Design and Analysis (3)
STAT 458  Categorical Data Analysis (3)
STAT 459  Nonparametric Methods (3)

COURSE DESCRIPTIONS

STAT 154 (4) Elementary Statistics
An introduction to statistical concepts and methods that is applicable to all disciplines. Topics include descriptive measures of data, probability and probability distributions, statistical inference, tests of hypotheses, confidence intervals, correlation, linear regression, and analysis of variance. The use of statistical software will be emphasized. Prerequisite: Satisfy Placement Table in this section, or MATH 098 with grade of P. Fall, Spring, Summer

GE-4

STAT 221 (3) Applied Probability and Statistics for Engineers
An introduction to statistics with emphasis on the applied probability models used in Science and Engineering. Topics covered include samples, probability, probability distributions, estimation, one and two samples hypotheses tests, correlation, simple and multiple linear regressions. Prerequisite: MATH 112 with grade of “C” (2.0) or better
Spring

STAT 354 (4) Concepts of Probability & Statistics
A calculus based introduction to probability and statistics. Topics include probability, random variables, probability distributions (discrete and continuous), joint probability distributions (discrete and continuous), statistical inference (both estimation and hypothesis testing), confidence intervals for distribution of parameters and their functions, sample size determinations, analysis of variance, regression, and correlation. This course meets the needs of the practitioner and the person who plans further study in statistics. Same as MATH 354. Prerequisite: MATH 122 with grade of “C” (2.0) or better
Fall, Spring, Summer

STAT (3) 356 Introduction to Programming in SAS
Introduction to basic programming techniques: creating DATA and PROC statements, statistical inference, tests of hypotheses, confidence intervals, correlation, linear regression, and analysis of variance. The use of statistical software will be emphasized. Working with arrays, loop and SAS macro. Prerequisite: STAT 154 or instructor’s approval
Odd Years: Spring

STAT 398 (0) CPT: Co-Operative Experience
Curricular Practical Training: Co-Operative Experience is a zero-credit full-time practical training experience for one semester and on adjacent fall or spring term. Special rules apply to preserve full-time student status. Please contact an advisor in your program for complete information. Prerequisite: At least 60 credits earned; in good standing; instructor permission; co-op contract; other prerequisites may also apply.
Fall, Spring, Summer
STATISTICS CONTINUED

STAT 450 (3) Regression Analysis
Simple and multiple linear regression, model adequacy checking and validation, identification of outliers, leverage and influence, polynomial regression, variable selection and model building strategies, nonlinear regression, and generalized linear regression.
Prerequisite: MATH 354 / STAT 354 or STAT 455 with "C" (2.0) or better or consent
MATH 455/STAT 455
Spring

STAT 451 (3) Design and Analysis of Experiments
Randomized complete block design, Latin squares design, Graco- Latin squares design, balanced incomplete block design, factorial design, fractional factorial design, response surface method, fixed effects and random effects models, nested and split plot design.
Prerequisite: MATH 354 / STAT 354 or STAT 455 with "C" (2.0) or better or consent
Fall

STAT 455 (4) Theory of Statistics I
A mathematical approach to statistics with derivation of theoretical results and of basic techniques used in applications. Includes probability, continuous probability distributions, multivariate distributions, functions of random variables, central limit theorem and statistical inference. Same as MATH 455.
Prerequisite: MATH 223 with "C" (2.0) or better or consent
Fall

STAT 456 (4) Theory of Statistics II
A mathematical approach to statistics with derivation of theoretical results and of basic techniques used in applications, including sufficient statistics, additional statistical inference, theory of statistical tests, inferences about normal models and nonparametric methods. Same as MATH 456.
Prerequisite: MATH 455, STAT 455 with "C" (2.0) or better or consent
Spring

STAT 457 (3) Sample Survey, Design and Analysis
Sampling distributions: means and variances. Bias, robustness and efficiency. Random sampling, systematic sampling methods including stratified random sampling, cluster sampling and two-stage sampling, ratio, regression, and population size estimation. Suitable statistical software is introduced, for example, MATLAB, R, SAS, etc.
Prerequisite: MATH 354, STAT 354 or STAT 154 with "C" (2.0) or better or consent
Fall (Even Years)

STAT 458 (3) Categorical Data Analysis
Forms of multivariate analysis for discrete data, two dimensional tables, models of independence, log linear models, estimation of expected values, model selection, higher dimensional tables, logistic models and incompleteness. Logistic regression. Suitable statistical software is introduced, for example, MATLAB, R, SAS, etc.
Prerequisite: MATH 354, STAT 354 or STAT 154 with "C" (2.0) or better or consent
Fall (Odd Years)

STAT 459 (3) Nonparametric Methods
Derivation and usage of nonparametric statistical methods in univariate, bivariate, and multivariate data. Applications in count, score, and rank data, analysis of variance for ranked data. Nonparametric regression estimation. Suitable statistical software is introduced, for example, MATLAB, R, SAS, etc.
Prerequisite: MATH 354, STAT 354 or STAT 154 with "C" (2.0) or better or consent
Fall (Even Years)

STAT 488 (1-3) Seminar
The study of a particular topic primarily based upon recent literature. May be repeated for credit on each new topic.

STAT 491 (1-4) In-Service
A course designed to upgrade the qualifications of persons on-the-job. May be repeated for credit on each new topic.

STAT 492 (3) Statistics Capstone Experience
This course is designed to allow undergraduate students an opportunity to integrate their statistics experiences by engaging each student in working on problems in applied or theoretical statistics.
Prerequisite: STAT 457, STAT 458, STAT 459, STAT 450 (at least two of these)
Spring

STAT 495 (1-4) Selected Topics
A course in an area of statistics not regularly offered. May be repeated for credit on each new topic.

STAT 498 (1-12) Internship
Provides a student the opportunity to gain expertise and experience in a special field under the supervision of a qualified person.

STAT 499 (1-4) Individual Study
Independent individual study under the guidance and direction of a faculty member. Special arrangements must be made with an appropriate faculty member. May be repeated for credit of each new topic.
