Pardon me. My name is ________________________________. I am a stutterer and I am working on my speech in speech therapy class. We are talking with people on how they feel about stuttering. Would you mind if I took a few minutes of your time and asked you several questions?

1. What do you think causes stuttering?

2. Do you feel uncomfortable or embarrassed when you talk to a stutterer?

3. What do you think a stutterer should do to overcome his stuttering?

4. Do you know anyone else who stutters?
   What is their stuttering like?

Thank you very much.
