Guest Speaker : Sarita Koushik
LP specialist: School Age Children

An event hosted by:

Children's Stuttering Project

The University of Vermont
In conjunction with:

Location is:

TBA
University of Vermont

LIDCOMBE PROGRAM

The Lidcombe Program was developed by Dr. Mark Onslow and his colleagues at the University of Sydney's Australian Stuttering Research Centre as a behavioral intervention for stuttering in preschool aged children. After training, speech-language pathologists teach parents to administer appropriate feedback about fluency and stuttering to their children in their everyday-speaking environment.

Studies have shown that stuttering can be maintained at near zero following treatment with the Lidcombe Program. This treatment has been adjusted for school-aged children and special populations.

WORKSHOP FACILITATORS

Barry Guitar, Ph.D. Barry has been treating preschool children with the LP for 7 years and has given many clinical workshops and data-based presentations on the LP. He has also practiced "Distance Lidcombe" for families in remote areas. LPTC.

Melissa Bruce, M.S. Clinic Director, University of Houston, has developed training programs for graduate students based on the LP, and has implemented and supervised this program for 10 years. LPTC

Rosalee C. Shenker, Ph.D. Executive Director, Montreal Fluency Centre, has been treating children with the LP for over 10 years. She has collaborated on several publications on the LP. LPTC.

Sarita Koushik, M.Sc. Montreal Fluency Centre. Ph.D. Candidate; University of Newcastle, Australia.

Day 1
