

HEALTH INFORMATICS

The Health Informatics program prepares students to use Information Systems and Health Information Technology (HIT) to design, evaluate, adopt, and apply technology-based innovations in healthcare delivery, management, and research. Study will include aspects of data acquisition, storage, retrieval, and use of health information to meet the demands of current healthcare issues through innovative and entrepreneurial strategies.

PROGRAMS

DEGREES AND CERTIFICATES

- Bachelor of Science in Health Informatics
- Health Informatics Certificate
- Professional Science Master

ABOUT THE PROGRAM

Students will be able to articulate the various types of healthcare organizations and ways that HIT is incorporated to solve problems in multidisciplinary real-life settings. Courses will help students develop collaborative team skills, project management, and leadership skills, along with the technical knowledge needed for data-informed decision-making.
