RE: MINNESOTA STATE UNIVERSITY, MANKATO  
UPDATED FIVE YEAR MASTER FACILITIES PLAN

Dear Brian:

Minnesota State University, Mankato is pleased to submit our updated master facilities plan. The past year engaged in the master planning experience created an important opportunity to reflect on past achievements and to assess current challenges. In alignment with our Strategic Goals and Initiatives and with Charting the Future, the following pages illustrate what we feel is the best mix of physical facilities and delivery practices to serve the needs of Minnesota's future workforce.

This plan is the result of extensive discussion, review and visioning across the breadth of the campus community and included surrounding neighbors, and planners for the City of Mankato. Our committees reflected upon and evaluated implementation achievements of preceding master plans, reviewed the campus' strategic priorities, and considered current and projected academic needs. The plan incorporates recognition of current documented classroom and other facilities shortages and condition deficiencies and projects a plan to remediate those needs.

MSU, Mankato remains committed to outstanding stewardship of all of our current facilities resources in alignment with state needs and global visions while planning for the campus of the future.

I look forward to reviewing this updated five year plan with you soon.

Best Regards,

  
Richard Davenport  
President
