

## 7.D Institutional Data

Minnesota State University, Mankato

# Enrollment Management Plan

2012-2017

David P. Jones, Vice President for Student Affairs & Enrollment Management  
5/13/2013

## **I. Introduction**

The purpose of enrollment management is to identify, recruit, and retain students in order for Minnesota State University, Mankato to fulfill its mission and goals. The following enrollment management plan will owe much of its success to the institution's ability to refine current recruitment and retention practices, while developing new strategies to achieve our goals. In short, the focus of the enrollment plan will be to improve our ability to identify potential students and to improve our student retention.

## **II. Reason for a Minnesota State University, Mankato Plan**

In Fall 2011, President Richard Davenport charged the campus with developing an enrollment management plan to improve our four-year graduation rate, improve our first year student to sophomore student retention rate, and grow the University to 20,000 students. The development of this enrollment management plan will not only align campus resources to tackle President Davenport's three measurable goals, but it will also focus us on necessary future planning and budgeting. This enrollment management plan provides concrete goals and strategies for the next five years (2012-2017).

## **III. Five-Year Enrollment Trends at Minnesota State University, Mankato**

Minnesota State Mankato is experiencing a growth period, unlike other institutions in the MnSCU system. Since 2007, Minnesota State Mankato has grown by 7.6% in total headcount and 4.7% in Full-Time Equivalent (FTE) undergraduate and graduate enrollment. More specifically, overall unduplicated undergraduate enrollment has grown by 6.6% and overall unduplicated graduate enrollment 14.6%. First-Year Students and Transfer Students have grown by 6.3% and 4.1% respectively. During this same time, enrollment of Ethnic Minorities has grown from 7.3% to 9.6%, International Student enrollment has grown from 3.4% to 4.1%, and the percentage of Caucasian students has decreased from 82.6% to 82.2%. The total number of students who have enrolled in online and off-campus coursework has increased by 14.3% during this same period.

Since 2007, retention rates have also remained rather steady. During this time period, Minnesota State Mankato has averaged a First-Year Student to Sophomore year retention rate of 76.6%. While this rate often leads the MnSCU Universities, there is a retention gap between various ethnicities. The retention rate for the First-Year to the Sophomore year for the 2010, International Students achieved a 95.0% retention rate, Caucasian Students a 77.4% retention rate, and Ethnic Minorities a 69.1% retention rate. Full-time graduate students had an 86.2% retention rate for the second fall.

## IV. Changes and Opportunities

The State of Minnesota is also going through changes in its citizenry that will have an impact on our enrollment management plan. According to the Minnesota Office of Higher Education, 2010 represents the beginning of a 10% decline in the number of high school graduates until 2017. A total drop of 5,346 students is expected from the 65,073 who graduated in 2010. This same period is expected to also correspond with a growth in High School Graduates of Color by 3%. To help us understand this decline, for Fall 2010, 51% of Minnesota high school graduates went to a post-secondary institution, of which 14% enrolled in a state university.

During the past five-year period, non-traditional student growth has occurred across the state. Representing a 3.8% increase over this period ending in 2010, non-traditional students in the 25-34 age range grew by 3.1%. For FY2010, this 25-34 age range represented 21.7% of all MnSCU students, which was only second to the 21-24 age range at 23.3%. Most of the 25-34 age students are place bound for their education.

### *Border States*

Most of our neighboring states will also experience a decline in high school graduates. South Dakota and North Dakota are expected to see decreases greater than 10% through 2015. Wisconsin should experience a decline just below 10%. Iowa is the lone border state expected to remain steady with its number of high school graduates.

### *Minnesota State University, Mankato Strategic Plan 2010-2015*

In 2010, Minnesota State Mankato put forth five strategic action steps to transform our University. These are:

- Change the world by collaboratively addressing our planet's most challenging problems.
- Foster the thriving and robust academic culture of a university with applied doctoral programs.
- Greatly expand the reach of our extended learning programs.
- Reinvigorate our physical home and build the campus of the future.
- Measure and continuously improve our work to ensure excellence in all that we do.

### *Minnesota State Colleges and Universities (MnSCU) Strategic Framework*

Chancellor Rosenstone has crafted a new Strategic Framework that provides further definition and demand of our enrollment management plan. The three parts of the new Strategic Framework are:

- Ensure access to an extraordinary education for all Minnesotans
- Be the partner of choice to meet Minnesota's workforce and community needs
- Deliver to students, employers, communities, and taxpayers the highest value / most affordable option

### *Summary of Changes and Opportunities*

The environment in which we recruit and retain students is changing. The number of high school graduates is declining, this declining population is growing more diverse, and our traditional out-of-state markets are experiencing the same. The enrollment figures and demographic shifts shared above will be significant factors in enrollment management planning.

## V. Elements of an Enrollment Management Plan

### *Goals*

<sup>a</sup>Refers to unduplicated headcount for Fall terms

Goals are the overall conclusion or accomplishment that the plan is hoping to achieve. Goals should be specific, quantifiable, and measurable.

### *Strategies*

Strategies are the overall methods that we will use to accomplish the goals.

### *Action Plans*

Action Plans describe how the strategies will be accomplished. Actions Plans include who is responsible, what the action is, a cost for the action, a timeline for the action, and a measurable outcome.

## **VI. Enrollment Management Goals and Strategies**

Minnesota State University, Mankato has identified the following four goals based on our Strategic Plan, MnSCU Strategic Framework, shifting state demographics, historical trend data, and our aspirations. The following goals and measures are based on 2010 graduation, retention, persistence, and enrollment rates reported in FY2011.

### *Goal One – Increase the first- to second-year retention rate incrementally to 85% by 2017*

- 1.1 Increase first-year student retention incrementally by 2% annually.
- 1.2 Develop campus tools and systems to assist in the retention of first-year students.

### *Goal Two – Increase our four-year graduation rate by 15% by 2017*

- 2.1 Increase First-Time First-Year Full-Time Student four-year completion rate incrementally by 3% annually.
- 2.2 Increase First-Time Full-Time Transfer Student two-year completion rate incrementally by 2% annually.
- 2.3 Develop campus tools and systems to promote 4-year graduation.

### *Goal Three – Increase our six-year graduation rate for all populations to 65% by 2017*

- 3.1 Increase six-year completion rate incrementally by 3% annually.
- 3.2 Develop campus tools and systems to assist in the retention of first-year students.

### *Goal Four – Increase total student enrollment through recruitment and retention to 17,000 by 2017<sup>a</sup>*

- 4.1 Increase new undergraduate student enrollment incrementally by 1.5% each year.
- 4.2 Increase new graduate student enrollment incrementally by 2% each year.
- 4.3 Increase current undergraduate student retention incrementally by 2% each year.
- 4.4 Develop campus tools and systems to assist in the recruitment and retention of students.
