INTEGRATED ENGINEERING

INTEGRATED ENGINEERING BSE, MINOR AND CERTIFICATES

Integrated Engineering

Department of Integrated Engineering
College of Science, Engineering & Technology
131 Trafton Science Center N • 507-389-2744
Websites: cset.mnsu.edu/ie and www.ire.mnscu.edu
Email: integrated.engineering@mnsu.edu
Chair: Dean Kelley
Faculty: Rebecca Bates, Dean Kelley, Eleanor Leung, Elizabeth Pluskowski, Robert Sleeter, Jacob Swanson, Yuezhou Wang
Affiliated Iron Range Faculty: Ronald Uelsen (Co-Director), Andy Lillesve

The Integrated Engineering Program is selective and subject to the approval of the Integrated Engineering Program faculty. Admission to the Integrated Engineering Program also requires the completion of the application found at the following website: http://cset.mnsu.edu/ie/apply.html.

Each application will be evaluated individually and the decision of Integrated Engineering Program faculty will be final. Failure to submit an application by stated deadline could result in the student being denied admission to the program. If a student is denied admission to the Integrated Engineering Program, he/she can reapply to the program for admission in subsequent years.

A. Minnesota State Mankato Students

This application form (http://cset.mnsu.edu/ie/apply.html) is submitted to the Integrated Engineering Program along with a copy of the student’s Minnesota State Mankato transcript and any transfer evaluations. Pre-engineering students at Minnesota State Mankato are not guaranteed admission to the program.

B. Transfer Students

Transfer students must submit an application to Minnesota State Mankato and follow all transfer policies. Students may be able to complete the required pre-engineering curriculum at another college or university and have these courses and credits transferred to Minnesota State Mankato, when applying for admission to the Integrated Engineering Program.

GPA Policy. GPA Policy: Students graduating with a B.S. in Engineering degree must have:

1. A cumulative GPA of 2.5 or higher.
2. Grades of 1.67 (“C-”) or better for courses taken at Minnesota State Mankato to be accepted.

P/N Grading Policy. P/N credit will not be applied to any course used to meet the degree requirements.

All students must follow all Minnesota State Mankato policies.

INTEGRATED ENGINEERING BSE

Degree completion = 128 credits

Required General Education
Students who complete the Minnesota Transfer Curriculum will satisfy the Composition (ENG 101) and Communications requirements.

ENG 101 Composition (4)
MATH 121 Calculus I (4)
PHYS 221 General Physics I (4)

Economics Course (Choose 3 Credits).
ECON 201 Principles of Macroeconomics (3)
ECON 202 Principles of Microeconomics (3)

Communications (Choose 3 - 4 Credits).
CMST 102 Public Speaking (3)
ENG 271W Technical Communication (4)

Chemistry (Choose 3 - 5 Credits).
CHEM 191 Chemistry for Engineers (3)
CHEM 201 General Chemistry I (5)

Prerequisites to the Major
ENGR 110 can be replaced by either an introduction to engineering course or a programming course similar to CS 110. Circuit Analysis should be accompanied by a lab. Students need a total of 32 Math and Science credits comprised of courses from General Education and prerequisites to the major.

EE 230 Circuit Analysis I (3)
EE 240 Evaluation of Circuits (1)
ENGR 110 Introduction to Project-based Engineering (3)
MATH 122 Calculus II (4)
MATH 222 Calculus III (4)
MATH 321 Ordinary Differential Equations (4)
ME 212 Statics (3)
ME 214 Dynamics (3)
PHYS 222 General Physics II (3)
PHYS 232 General Physics II Laboratory (1)

PHYS 223 General Physics III (3)
PHYS 233 General Physics III Laboratory (1)

CHEM 202 General Chemistry II (5)

Biology (Choose 4 Credits).
BIOL 105 General Biology I (4)
BIOL 106 General Biology II (4)

All courses and credits shown above must be completed before full enrollment in 300-level engineering courses, unless special permission is granted by the department chair. All of the above courses must be taken for “grade”. It is not acceptable for the student to take any of these courses on a pass/no credit basis. A grade of “C” or better must be achieved in each course. Students may be admitted provisionally while these requirements are being satisfied.

Application to Program. To be considered for admission, the student must have a cumulative GPA of 2.5 for all science, math, and engineering courses. Admission to the Integrated Engineering Program is selective and subject to the approval of
Major Common Core
All students must complete 6 credits of ENGR 370, 6 credits of ENGR 371, 2 credits of ENGR 320, 2 credits of ENGR 420 and 4 credits of ENGR 492.
ENGR 301 Design I (3)
ENGR 302 Design II (3)
ENGR 311 Professionalism I (3)
ENGR 312 Professionalism II (3)
ENGR 320 Engineering Core Competencies I (1-2)
ENGR 370 Mechanical Core Competencies I (1-6)
ENGR 371 Electrical Core Competencies I (1-6)
ENGR 401 Capstone Design I (3)
ENGR 411 Professionalism III (3)
ENGR 412 Professionalism IV (3)
ENGR 420 Advanced Engineering Core Competencies I (1-2)
ENGR 492 Seminar (1)

Thesis or Capstone Design (Choose 3 Credits).
Students have the option of completing a thesis or a fourth design project.
ENGR 402 Capstone Design II (3)
ENGR 498 Senior Thesis (3)

Major Restricted Electives
Choose 6-7 credits of approved Arts and Humanities courses and choose 6-7 credits of Social Science courses for a total of 13 credits. The Depth Requirement can be fulfilled by a sequence of courses in the same department (such as HIST 180 and HIST 181) or PHI 101 and PHI 321W. A list of approved courses can be found at the program website. Students should also meet the University’s diverse cultures requirement. Students who complete the Minnesota Transfer Curriculum will satisfy the depth requirement.

Major Unrestricted Electives
Choose one group from the following.
Broad Focus (Choose 16 Credits)
Students choosing not to complete a focus area must complete 0-2 credits of ENGR 355 and 14-16 credits of ENGR 455, ENGR 470 or ENGR 471. The engineering field of these elective credits is unrestricted.
ENGR 355 Elective Technical Competency I (1-2)
ENGR 455 Advanced Technical Competency I (1-8)
ENGR 470 Mechanical Advanced Competency I (1-2)
ENGR 471 Electrical Advanced Competency I (1-2)
Mechanical Focus (Choose 16 Credits)
Students choosing a mechanical focus must complete 2 credits of ENGR 470, 0-2 credits of ENGR 355 and 12-14 credits of ENGR 455 or ENGR 471. At least 12 credits of ENGR 355 and ENGR 455 must be in the field of mechanical engineering. At least two of the four engineering projects must include design of mechanical systems.
ENGR 355 Elective Technical Competency I (1-2)
ENGR 455 Advanced Technical Competency I (1-8)
ENGR 470 Mechanical Advanced Competency I (1-2)
ENGR 471 Electrical Advanced Competency I (1-2)
Electrical Focus (Choose 16 Credits)
Students choosing an electrical focus must complete 2 credits of ENGR 471, 0-2 credits of ENGR 355 and 12-14 credits of ENGR 455 or ENGR 470. At least 12 credits of ENGR 355 and ENGR 455 must be in the field of electrical engineering. At least two of the four engineering projects must include design of electrical systems.
ENGR 355 Elective Technical Competency I (1-2)
ENGR 455 Advanced Technical Competency I (1-8)
ENGR 470 Mechanical Advanced Competency I (1-2)
ENGR 471 Electrical Advanced Competency I (1-2)
Other Focus Areas (Choose 16 Credits)
Students choosing a focus area other than mechanical or electrical must complete 0-2 credits of ENGR 355 and 14-16 credits of ENGR 455, ENGR 470 or ENGR 471. At least 14 credits of ENGR 355 and ENGR 455 must be in the field of focus. At least two of the four engineering projects must include design of focus-area systems.
ENGR 355 Elective Technical Competency I (1-2)
ENGR 455 Advanced Technical Competency I (1-8)
ENGR 470 Mechanical Advanced Competency I (1-2)
ENGR 471 Electrical Advanced Competency I (1-2)

TECHNICAL INTEGRATION & DESIGN MINOR

16 Credits

Two Locations: Mesabi Range College, Normandale Community College

The minor in Technical Integration & Design is for students who wish to learn about engineering design processes and gain experience working with and contributing to an engineering design team. Students will work with a team on an industry-sponsored project and complete 8 credits of technical competency coursework. In this context, they will develop their awareness of engineering technology and design processes while developing professional skills that can be carried forward into a career working with engineers in industry, complementing the expertise developed in their major. Students should have junior/senior standing in their major and must apply for admission. The application form can be found at http://cset.mnsu.edu/ie/minor.html.

Policy. This minor is not available for Integrated Engineering majors.

GPA Policy: Students earning a minor in Technical Integration & Design must have:
1. A cumulative GPA of 2.5 or higher in minor courses.
2. Grades of 1.67 (“C-”) or better for individual minor courses.

P/N Grading Policy. P/N credit will not be applied to any course used to meet the certificate requirements.

Standards. Students must complete the application process for the minor, indicating relevant course experience, completing the essays, and presenting a learning plan. Students must have a 2.5 or higher GPA and be a junior or senior in their major. Admission to the minor is selective and subject to the approval of the Integrated Engineering faculty.

Core
ENGR 300 Introduction to Engineering Design for Non-Majors (4)
ENGR 311W Professionalism I (3)
ENGR 492 Seminar (1)

Statistics & Modeling/Programming (Choose 2 Credits)
ENGR 320 Engineering Core Competencies I (1-2)

Elective
Choose 4 credits from the following.
ENGR 420 Advanced Engineering Core Competencies I (1-2)

TECHNICAL INTEGRATION & DESIGN CERTIFICATE

16 Credits

Two Locations: Mesabi Range College, Normandale Community College

The Technical Integration & Design Certificate program is for students with junior or senior standing in their major or graduates who wish to learn about engineering design processes and gain experience working with and contributing to an engineering design team. Students will work with a team on an industry-sponsored project and complete 8 credits of technical competency coursework. In this context, they will develop their awareness of engineering technology and design processes while developing professional skills that can be carried forward into a career working with engineers in industry, complementing the expertise developed in their major. Students must apply for admission. The application form can be found at http://cset.mnsu.edu/ie/minor.html.

This certificate is not available for Integrated Engineering majors.

GPA Policy: Students earning a certificate in Technical Integration & Design must have:
1. A cumulative GPA of 2.5 or higher in certificate courses.
2. Grades of 1.67 (“C-”) or better for individual certificate courses.

P/N Grading Policy. P/N credit will not be applied to any course used to meet the certificate requirements.

Core
ENGR 300 Introduction to Engineering Design for Non-Majors (4)
ENGR 311W Professionalism I (3)
ENGR 492 Seminar (1)

Statistics & Modeling/Programming (Choose 2 Credits)
ENGR 320 Engineering Core Competencies I (1-2)

Elective
Choose 4 credits from the following. TID Certificate students can take 4 credits of ENGR 355.
ENGR 355 Elective Technical Competency I (1-2)

PROJECT BASED ENGINEERING CERTIFICATE

15 Credits

Two Locations: Mesabi Range College, Normandale Community College

The Project-Based Engineering Certificate program is for students with junior or senior standing in an engineering program in the US or abroad. Students will work with a team on an industry-sponsored project and complete 8 credits of technical competency coursework. In this context, they will further develop their skills in engineering technology, design and professionalism. Students should have completed prerequisites for the integrated engineering program before beginning the certificate program. The application form can be found at http://cset.mnsu.edu/ie/minor.html.
This certificate is not available for Integrated Engineering majors.

**GPA Policy:** Students earning a certificate in Technical Integration & Design must have:
1. A cumulative GPA of 2.5 or higher in certificate courses.
2. Grades of 1.67 (“C-”) or better for individual certificate courses.

**P/N Grading Policy:** P/N credit will not be applied to any course used to meet the certificate requirements.

**Major Common Core**

Students with junior standing in an engineering program will take ENGR 301 and ENGR 311W. Students with senior standing or an earned engineering bachelor’s degree will take ENGR 401 and ENGR 411W.

**Prerequisite:** ENGR 492 Seminar I (1)

**Engineering Design (Choose 3 Credits)**

- ENGR 301 Design I (3)
- ENGR 401 Capstone Design I (3)

**Professionalism (Choose 3 Credits)**

- ENGR 311W Professionalism I (3)
- ENGR 411W Professionalism II (3)

**Major Unrestricted Electives**

Choose 8 credits from the following. No more than 2 credits each of ENGR 320, ENGR 420, ENGR 470 and ENGR 471 and no more than 6 credits each of ENGR 370 and ENGR 371 are allowed.

Choose 8 Credits

- ENGR 320 Engineering Core Competencies I (2)
- ENGR 370 Mechanical Core Competencies I (6)
- ENGR 371 Electrical Core Competencies I (6)
- ENGR 420 Advanced Engineering Core Competencies I (2)
- ENGR 455 Advanced Technical Competency I (1-2)
- ENGR 470 Mechanical Advanced Competency I (1-2)
- ENGR 471 Electrical Advanced Competency I (1-2)

**COURSE DESCRIPTIONS**

**ENGR 110 (3) Introduction to Project-based Engineering**

Introduction of the engineering design process, professional skills necessary for the modern engineer, learning strategies needed for academic success, and overview of engineering applications relevant to society. Students will use engineering tools to complete an engineering team project.

Fall, Spring

**ENGR 293 (1) MAX Scholar Seminar**

This class provides MAX scholars with an opportunity to explore a set of topics related to achieving success in academic, professional and personal realms. Speakers will include faculty, graduate students, visiting researchers and industry members as well as student participants.

Prerequisite: Recipient of a MAX scholarship or instructor consent

Fall, Spring

**ENGR 299 (3) Bridge to Project-based Engineering**

An introductory project-based learning experience in engineering designed to prepare students for upper-division project-based work. Students will be exposed to teamwork, self-regulated learning, and the design process as they participate in the design and implementation of an engineering project.

Prerequisite: Admission to Integrated Engineering major or consent.

On Demand: Fall, Spring, Summer

**ENGR 300 (4) Introduction to Engineering Design for Non-Majors**

Students working towards a minor in the Department of Integrated Engineering will participate in and reflect on the engineering design process, the professional aspects of working on an engineering team, and the intersection of engineering projects and their major. Design activities include such things as scoping, modeling, experimentation, analysis, modern tools, design reviews, multidisciplinary systems view, creativity, safety, business plans, and global/societal/environmental impacts.

Prerequisite: Students must be admitted to the minor program in the Department of Integrated Engineering minor or certificate program.

Co-requisites: ENGR 311W

On Demand: Fall, Spring, Summer

**ENGR 301 (3) Design I**

Students learn and practice the essential elements of engineering design through industry project implementation: scoping, modeling, experimentation, analysis, modern tools, design reviews, multidisciplinary systems view, creativity, safety, business plans, global/societal/environmental impacts.

Fall, Spring

**ENGR 302 (3) Design II**

Students further learn and practice the elements of engineering design through industry project implementation: scoping, modeling, experimentation, analysis, modern tools, design reviews, multidisciplinary systems view, creativity, safety, business plans, global/societal/environmental impacts, modern tools, design reviews, multidisciplinary systems view, creativity, safety, business plans, global/societal/environmental impacts.

Fall, Spring
ENGR 412W (3) Professionalism IV
Students further learn/develop professionalism while interacting regularly with clients from industry. Topics include further development and practice of leadership, metacognition, teamwork, written and oral communication, ethics, and professional and personal responsibility, in project context, with reflection on education growth. Prerequisite: ENGR 401, ENGR 411W 
Fall, Spring
VW

ENGR 420 (1-2) Advanced Engineering Core Competencies
Students gain breadth across all objectives and depth in the areas of engineering economics and entrepreneurship. Prerequisite: Admission to major, minor or certificate programs. Fall, Spring

ENGR 455 (1-8) Advanced Technical Competency
In-depth study of an engineering area related to an engineering project or foundation topic in a focus area such as biomedical, chemical, combustion, computer, electrical, engineering management, environmental, mechanical, process, renewable energy, structural, systems or transportation engineering. Course may be repeated. Co-require: ENGR 370, ENGR 371 
Fall, Spring

ENGR 470 (1-2) Mechanical Advanced Competency
Students gain breadth across all objectives and depth in an area of: heat transfer, structural. Prerequisite: ENGR 370 
Fall, Spring

ENGR 471 (1-2) Electrical Advanced Competency
Students gain breadth across all objectives and depth in an area of: 3-phase AC systems, control systems. Prerequisite: ENGR 371 
Fall, Spring

ENGR 492 (1) Seminar
Students learn about engineering practice through seminars with practicing engineers from industry and are assisted in their development as learners through workshops. This course is repeated by Integrated Engineering students every semester. Fall, Spring

ENGR 493 (1) MAX Scholar Seminar
This class is for MAX scholars and covers topics related to achieving success in academic, professional and personal realms. Speakers will include faculty, graduate students, visiting researchers and industry members. Students will mentor lower division scholars and do presentations. Prerequisite: Recipient of a MAX scholarship or instructor consent.
Fall, Spring

ENGR 494 (1) Global Experience in Engineering and Technology
This class provides students pursuing a minor in "Global Solutions in Engineering and Technology" with an opportunity to explore a set of topics related to achieving success in advance of and following an international experience (internship, study abroad, etc.). Speakers will include faculty, graduate students, visiting researchers and industry members as well as student participants. Returning students will be required to participate in mentoring of students preparing for their international experience and provide written and/or oral presentations of various topics during the semester. This course is required both before and after participation in the international experience (min. 2 cr.) Variable

ENGR 496 (1-4) Selected Topics in Engineering
Special topics not covered in other courses. May be repeated for credit on each new topic. Prerequisite: Consent Variable

ENGR 498 (3) Senior Thesis
Advanced study and research required. Topic of the senior thesis determined jointly by the student and the faculty advisor. Deliverables include written thesis and formal oral presentation. Prerequisite: Senior standing in program and at least 14 credits earned in technical competencies. Fall, Spring, On Demand: Summer
